INFORMATION REPORT

CD NO.

COUNTRY :

USSR (Gorki Oblast)

DATE DISTR.

3 Nov. 1949

SUBJECT

Jet Fighters Observed over Igumnovo, Southwest of Gorki

NO. OF PAGES

PLACE **ACQUIRED**

25X1X

25X1A

Roturn to CIA Library

NO. OF ENCLS.

DATE OF INFO

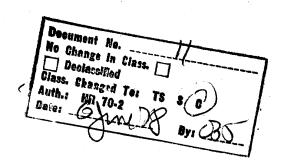

SUPPLEMENT TO REPORT NO.

A jet fighter flying at an altitude of about 3,300 feet was observed over IGU NOVO (43°33'E/56°16'N) almost every other day at varying hours. Description of this plane: Monoplane with steeply rising rudder assembly, retractable landing gear; the sweptback wings formed an angle of almost 45 °.

25X1A

Comment:

The flight observed at irregular hours over IGUNNOVO presumably were test flights with jet aircraft produced in the GGR KT Air-craft Plant No 21 (or 92). This assumption is supported by the rough descriptive data (pronounced sweepback and steeply rising ru der assembly) and the fact that only individual planes were seen. It is also possible that flights for the measurement of speed are conducted along the railroad line which runs almost in a straight line in this area.
